

## FEMTOOPTICS™ Catalog 2011 | 2012

**October 27<sup>th</sup>, 2011**

FEMTOLASERS has expanded its popular FEMTO-OPTICS™ line of premier optical components. The new line fully supports ultrafast applications and helps to exploit the capabilities of your ultrafast lasers, covering the entire beam path - from source to target, from generation to detection by offering

- negative dispersive mirrors
- low dispersive optics
- ultra broadband optics

The new highlights include, among others:

- deep UV spectral range components such as steering optics and dispersive mirrors
- ultra broadband reflective phase retarders
- an integrated dispersion fine tuning unit
- dielectric beam splitters for sub-25 fs pulses
- opto-mechanics for mirror compressors

FEMTOOPTICS™, designed for ease-of-use, allow you to focus on your application rather than on the photonics equipment. We also provide exceptional service and assistance globally, from our experienced and responsive experts in ultrafast optics and applications.

Get 10% off the list price on all stock items if ordered before Nov. 30<sup>th</sup> 2011.

### **FEMTOLASERS Produktions GmbH**

*is the premiere manufacturer of ultra-fast, compact and reliable laser oscillator and amplifier solutions. Founded in 1994 in Vienna, Austria, the company offers products and excellent services which have evolved to be the first choice among OEMs and scientists worldwide for demanding applications and solutions. FEMTOLASERS state-of-the-art products offer technology of highest quality.*
